

# Infrastructure and Construction Consultants

A high-speed train, likely a British Rail Class 390, is stopped at a station platform. The train is black and yellow, with a prominent yellow nose. The platform is covered by a large, arched glass and steel roof. Several people are visible on the platform, some standing and some walking. The train's red tail light is illuminated. The overall scene is a busy railway station.

Initiate Consulting is one of the UK's **most exceptional** providers of specialist professional services in the commercial and construction management space, focusing on rail, aviation and infrastructure projects.

We are **always** on the lookout for suitably experienced sub-consultants to add to our database. From there we source people for leading roles in a wide range of projects and frameworks found from successful tenders.

**If you have a proven track record then please consider yourself invited to join us in this exciting and thriving era of national infrastructure development.**

## Examples of typical projects, include:

- The redevelopment and future proofing of Birmingham International Station in readiness for the arrival of HS2. With construction work commencing in 2022, the project will create a fully integrated multi-transport facility enabling regional growth.
- The creation of a state of the art VIP lounge in Heathrow Terminal 3 for a truly world-class global client. The first of its kind in Europe with world-leading facilities.

Do you have the necessary **experience, enthusiasm and outlook?**

Would you relish the challenge of an exciting opportunity to grow professionally?

If so, please email **Tessa Chesney** at **[talent@initiate.uk.com](mailto:talent@initiate.uk.com)** and you too can be part of an exciting dynamic future.
